Re: Changes to Control Standard Endotoxin

Dear Valued Customer:

This letter is to inform you that Associates of Cape Cod, Inc. (ACC) has changed to a new supplier of raw material for Control Standard Endotoxin (*Escherichia coli* O113:H10). This change affects the E0005 product family, which consist of the following:

- Catalog Number E0005, 0.5 µg/vial (single vial pack)
- Catalog Number E0005-5, 0.5 µg/vial (5 pack)
- Catalog Number E0005-25, 0.5 µg/vial (25 pack)

The formulation of the product remains unchanged. Material from the new supplier has been evaluated and found to be equivalent to that from the previous supplier. This change of raw material has previously been applied to the E0125 and EC010 product families, which consist of:

- Catalog Number E0125, 125 µg/vial (single vial pack)
- Catalog Number E0125-5, 125 µg/vial (5 pack)
- Catalog Number E0125-25, 125 µg/vial (25 pack)
- Catalog Number EC010-5, 10 ng/vial (5 pack)
- Catalog Number EC010-25, 10 ng/vial (25 pack)

As a result of this change, the expiration date for the E0005 products has been set at 24 months from date of manufacture. This expiration date will be extended as additional stability data become available.

If you have any questions, please contact our Technical Service Department at 800-848-3248 or 508-540-3444.

Sincerely,

Gillian Foley
Quality Assurance Manager
