Notification Regarding Changes to Chromo-LAL Reagent Hazard Information

Dear Valued Customer,

We are writing to inform you of important updates to the labeling of our Chromo-LAL reagent packaging. As part of our continued commitment to safety and compliance, we have made significant changes to the hazard information associated with this product.

We have updated the hazard and precautionary statements to better align with the product safety data sheet (SDS) and to provide clearer and more comprehensive information regarding the safe handling and use of the Chromo-LAL reagent. These changes are designed to enhance your understanding of the potential hazards and to promote safer practices in your laboratory environment.

The changes will more accurately reflect the potential risks associated with the reagent and offer clearer guidance on safe handling, storage, and disposal practices.

Ensuring the safety of your team and the integrity of your work is our top priority, and we believe these changes will contribute to that goal.

If you have any questions or require further information regarding these updates, please do not hesitate to reach out to us at custservice@acciusa.com.

Thank you for your understanding and continued partnership.

Best regards,

Associates of Cape Cod, Inc.(ACC)
